

andis®

Choose Andis clippers and trimmers for the highest standard in care. Our advantages are what set us apart. Motors are quiet so the noise won't upset animals. The absence of cooling fans stops hair from blowing into wounds or incisions. And they're virtually maintenance free, requiring no oiling or greasing of internal parts. Try one today and see why we're different. Andis is the #1 choice with veterinarians nationwide.

SUPER
