

easi-scan

The bovine
ultrasound system
chosen by
specialists

The right imaging solution
for **your** practice

The **new Easi-scan** has been designed to make your job **easier than ever**, allowing you to get the most from your scanning sessions.

From day one you will clearly notice that your work becomes easier; and soon realise why Easi-scan is a worthwhile investment.

Acquiring the ultrasound system chosen by specialists will allow you to **achieve more everyday**.

PORTABLE

- **Smaller and lighter than ever**
To give maximum mobility and less strain at the end of the day.
- **Up to 7 hours of scanning**
Giving you enough power to run for the whole working day.
- **Standby battery saver**
Switches off the scanner when not in use allowing as much as 14 hours battery life.
- **Carry case with docking station**
The easiest way to transport your equipment and charge it!

EASY TO USE

- **Goggles enabled system**
BCF's own BUG's goggles are designed for cattle scanning and make the whole process easier. They prevent body strain when looking at the image and most importantly leave your hands free to work.
- **Improved image quality**
Making the diagnosis easier, faster and more accurate.
- **4 buttons**
To save you from dealing with a complicated system full of buttons.
- **4 preset modes**
Sexing, pregnancy, fertility and detail are the preset applications using the same multi frequency probe (4.5 - 8.5 MHz). As a result, you will save time and hassle adjusting the image.

DURABLE AND RELIABLE

- **Robust and splash resistant**
Rugged, compact and resistant to water splashes, the new Easi-scan is a unique system specifically designed for use on farm.
- **Safe**
Having your hands free , total mobility and no mains power leads will provide protection from unexpected situations. Easi-scan has been designed to give you maximum performance at the lowest risk.
- **Fast**
All the features above make the new Easi-scan the ultrasound scanner which will do more animal fertility examinations in less time, allowing you to achieve more every day.

Fast, easy, safe and robust are some of the clear benefits directly associated with Easi-scan which altogether bring you the most important advantage, efficiency.

WHY GOGGLES?

The main reason to choose a goggle operated system is having the image in front of your eyes bringing you several associated benefits:

- It is **faster** since you have more mobility.
- It is **safer** as your hands will be free. This allows you to work better but also to protect you from unexpected dangerous situations.
- It is also **comfortable to use** with less body strain as the image is just in front of your eyes!

WHY BUGS GOGGLES?

In addition to the list of benefits mentioned, BUGs offer:

- **Peripheral vision**, which lets you see both the animal and the image with a simple movement of your eyes.
- **Image quality**, even under bright sunlight.
- **Robustness**, in any weather or condition.

You will clearly see why BUGs is the best option.

The right imaging solution
for **your** practice

Learn why the new Easi-scan gives you more.

	Previous Easi-scan	New Easi-scan	Benefits
Image quality	Good	Excellent	Easier, faster, accurate
Multi frequency probe. (4.5 - 8.5) MHz	Yes	Yes	More applications in just one probe
Battery life	3.5 hours	7 hours	Total autonomy in the working day
Standby battery saver	No	Yes	Extended autonomy
Size	Small	The smallest on the market	Total mobility
Weight	3 kg	2 kg - the lightest on the market	Mobility and comfort
Goggles	Yes	Yes	Mobility, flexibility and safeness
Wireless monitor	Yes	Yes - 10" flat and light screen	Flexibility
Wrist display	Yes	Yes - improved version	Flexibility
Carry case charger	No	Yes	Portability and flexibility
Car charger	Yes	Yes	Flexibility
Image storage	Yes	Yes - with easy USB data export	Peace of mind, easy and fast
Splash resistant	Yes	Yes	Peace of mind and faster to clean
Probe reinforcement	Yes	Yes	Durability and peace of mind
Preset modes	Yes	Yes	Easy and fast
4-button operating system	Yes	Yes	Easy and fast
